

NAME

bibzbladd.pl – add Zbl numbers to papers in a given bib file

SYNOPSIS

bibzbladd [-f] [-o *output*] *bib_file*

OPTIONS

-f Force searching for Zbl numbers even if the entry already has one.

-o *output*

Output file. If this option is not used, the name for the output file is formed by adding `_zbl` to the input file

DESCRIPTION

The script reads a BibTeX file. It checks whether the entries have Zbls. If not, tries to contact internet to get the numbers. The result is a BibTeX file with the fields `zblnumber=...` added.

The name of the output file is either set by the `-o` option or is derived by adding the suffix `_zbl` to the output file.
