Abstract

This sample paper shows one way to use the sf298 package along with the article documentclass to generate a paper with the standard form 298 as the second physical page in the document.

In addition, the common text of the title, authors and abstract are shared and the "`\thanks`" macro is treated specially so that it is active for the titlepage and inactive for the report documentation page.

*We wish to thank all those who helped with this project. The views and conclusions contained in this document are those of the authors and should not be interpreted as representing anyone else.
