

NAME

`t1binary` – convert PostScript Type 1 font from ASCII to binary

SYNOPSIS

`t1binary` [`-l` *length*] [*input* [*output*]]

DESCRIPTION

`t1binary` converts Adobe Type 1 font programs in PFA (hexadecimal) format to PFB (binary) format. If the file *output* is not specified output goes to the standard output. If the file *input* is not specified input comes from the standard input.

OPTIONS

`--block-length=`*length*, `-l` *length*

Set the maximum length of sections in PFB output to *length*. The default length is as large as memory allows.
